

The Vegas Valley Treatment Center of 1835 East Charleston Boulevard, Las Vegas, NV 89104 is requesting a Special Use Permit to allow our licensed doctor, licensed nurses, and licensed counselors to treat individuals with Drug Addiction. The planned treatment center will provide voluntary drug treatment to individuals seeking to gain control of their lives through the treatment for addiction.

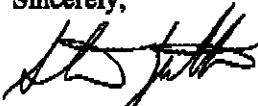

Individuals seeking treatment from our facility will be doing so of their own choice in order to improve their lives as well as the family members and individuals they interact with on a regular basis. The treatment center receives new clients by word of mouth and referrals from other clients. During the intake of a client they fill out with a counselor a 30+ page history and at that time we would find out if they were court ordered and reject and refer to the individual to another treatment center at that time.

Providing such treatment to individuals in a safe and respectful manner will allow for a more positive outcome through treatment. We believe, not only will this assist the individual but, the Las Vegas area as well by moving people away from illicit drugs and onto the road to recover where an individual can sustain themselves in our community without doing activity that can continue to put them at risk. The present estimate for the number of people to be served is between 200-300 per month, depending on the individual needs and the amount of counseling each person would require.

The proposed hours of operation are Monday through Saturday 6am until 3pm. No holidays or Sundays. At this time the state license is being with-held pending our treatment center obtaining a City of Las Vegas business license, which we need the Special Use Permit for before we can get.

Thank you for your time and consideration in this matter and we look forward to the opportunity to bring recovery and success to individuals in the Las Vegas Valley seeking assistance.

Sincerely,

Steven Zeitlin
President
